

This map shows the location and coverage areas (**black circles**) for the village's three existing outdoor warning sirens. Also indicated is the approved location and coverage area (**blue circle**) for a fourth siren to be installed at the southwest corner of the village in the single-family-home area of the Valley View development (the former Huspen farm).

On February 14th, 2005, the Village Board of Trustees approved a proposal for a fourth outdoor warning siren to be placed near the southwest corner of the village within the Valley View subdivision (the former Huspen farm property). As per the recommendation of the Board, the new siren (which will be provided by the developers of Valley View) will be a rotating-type siren identical or comparable to Siren #2 located on the public school property. The current plan is for the new siren to be installed when development of the single-family portion of Valley View begins.
